Re: Grant No. 3005

Dear Dr. Hollenberg:

The Scientific Director and CTR's staff have discussed your request for supplemental support of the FASEB symposium *"Cytochrome P-450: Advances and Prospects"* to be held in conjunction with the FASEB meeting in Atlanta, GA on April 21, 1991.

Although our resources for meeting support are essentially exhausted, we do realize that funds for this purpose are difficult to come by, and we would definitely like for the meeting to be a success. I therefore am pleased to tell you that we will make an additional contribution of $500.00, for a total contribution of $1000.00, to help defray the costs of the symposium. A check for the supplemental amount is enclosed with this letter; it would assist in our record-keeping if we could have a short written acknowledgment of the contribution.

As before, we request only that these funds not be used to reimburse expenses incurred by participants from the industrial sector. I regret that the direct conflict in meeting times with our own Scientific Advisory Board will prevent attendance by a representative from this organization.

Sincerely,

Harmon C. McAllister
